About

I love working with HTML, CSS, and JavaScript, but I'm happy to use the tools most suitable for the job, such as React.JS.

I hold a Bachelor's degree in Computer Science, majoring in Informatics Engineering, from a private university in Jakarta. My experience includes contributing to web development projects, where I worked on redesigning websites and implementing features to enhance functionality and user experience.

As a developer, I am constantly learning and improve my skills. I look forward to collaborating on projects that challenge me and contribute to creating better digital experiences.

Skills

- HTML, CSS, JavaScript, React JS, Redux, Tailwind CSS
